

**Misdirection:** The scoops on Cycra's Powerflow shrouds don't scoop air into the radiators, they direct it around them.

**TECH: BERNOULLI RACING TEAM**

Dear MXA,

I heard that Team Yamaha uses special radiator shrouds that increase the flow of air through the radiators. Are these works parts or can a normal person get them?

Cycra supplies Team Yamaha with its Powerflow Intake shrouds that use the Bernoulli Effect to help more air flow through the radiators. By increasing air flow by the radiators the air going through the radiators speeds up. Powerflow radiator shrouds retail for \$59.95 and can be ordered by calling (740) 929-0188.
